SUMMARY

AI Engineer with 1+ year experience building production LLM, RAG, and voice AI systems. Reduced API latency by 50%, deployed real-time speech pipelines handling 200+ users. Specialized in scalable GenAI systems, multi-agent orchestration, and MLOps.

SKILLS

AI & LLM	LangChain, LangGraph, RAG, NLP, FAISS, Pinecone
Programming	Python, C++, JavaScript
Backend & APIs	FastAPI, Flask, REST APIs, Redis, PostgreSQL
Voice & Speech	LiveKit, Whisper, STT, TTS
DevOps & Tools	Docker, CI/CD, AWS (EC2, S3, Lambda), GitHub Actions

EXPERIENCE

AI/ML Solutions Executive Prudential Solutions <i>Part-time</i>	Aug 2025 – Present Islamabad, Pakistan
---	---

- Promoted to part-time in 60 days — delivered production AI on AigilityX, a live Sovereign AI platform.
- Built real-time voice AI (STT → LLM → TTS) with sub-second latency serving 200+ concurrent users.
- Engineered Redis API Gateway cutting response latency by 50%; deployed across Railway and Vercel.
- Architected GPT-4 + Mistral fallback chatbot covering 5 cities, 3 languages with zero-downtime failover.
- Automated CI/CD via GitHub Actions, eliminating manual deployments and cutting release overhead 70%.

Data Science Intern 10Pearls <i>Part-time</i>	Jun 2025 – Aug 2025 Islamabad, Pakistan
---	--

- Built XGBoost AQI forecasting model with $R^2 > 0.85$ and MAE $< 10\%$, outperforming baseline by 30%.
- Engineered end-to-end ML pipeline — feature engineering through daily retraining — via GitHub Actions.
- Added explainability layer using SHAP and LIME, enabling stakeholder audits and cutting debug time 40%.

PROJECTS

AigilityX AI Platform. Enterprise Sovereign AI platform with RAG, multi-agent orchestration, STT/TTS, Supabase, and scalable inference gateway; live at aigilityx.com serving business clients across multiple verticals.

[\(GitHub\)](#) | [\(Live Demo\)](#)

AQI Predictor Islamabad. Production ML system forecasting air quality with automated retraining pipelines, model explainability, and a live Streamlit dashboard; achieves sub-10% error on real-world Islamabad sensor data.

[\(GitHub\)](#) | [\(Live Demo\)](#)

Speech-to-Speech Voice AI. Low-latency ($< 1s$) voice interaction system built with LiveKit, OpenAI Realtime API, FastAPI, and Next.js; handles real-time speaker turns end-to-end and is deployed on AWS and Vercel.
